Bickford

Making Things Easier For You

The All-In-One True Level Access Pod

Bickford's innovative and easy-to-install All in one True level access Pods are ideal for clients and families who do not want to adapt their bathroom to a permanent wet floor. The pod enables a person to quickly benefit from showering, especially when immediate needs are paramount. The pod has been designed to fit in any room where water, waste and power supply have been made available. Where no suitable plumbing is available, wastewater can simply be pumped away.

The Pod also benefits from the fact that it can be relocated and recycled, it provides great flexibility to end-users and enables local authorities and housing

associations to best reflect their varied tenants' needs. Private landlords also embrace the cubicle given that a property can easily be made good once the Pod has been re-sited in another property compared to a permanent wet floor adaptation.

Bickford's True level access pod provides complete showering and toileting facilities all in one. The Pod provides a watertight showering enclosure, with the added WC and hand basin completing the facilities available to enhance personal care.

Stair Lifts

Bickford

Making Things Easier For You

Stair Lifts

Straight stair lifts are for use on stair cases that only travel in one single straight line, without interruption from landings or platforms, turns or curved steps.

We offer three different straight stair lift systems and a choice of seats, this is to ensure that the lift is best tailored to you, your needs and your budget. A lot of homes have staircases that go around at least one corner, sometimes stairs can be tight and stairs may be narrow. Our made to measure curved stair lifts can travel around corners, across immediate landings and up spiral stair cases. Our stair lifts are designed around your staircase and your individual needs.

Through Floor Lifts

Bickford

Making Things Easier For You

Through Floor Lifts

Our through floor lifts are ideal for people who cannot negotiate the stairs to access the bathroom and bedroom and who do not want to lose a room downstairs to have a bathroom fitted.

Where possible a through floor lift can be fitted giving the customer their independence to bathe freely and independently. It is also a more cost-effective solution than an extension.

Our through floor lifts are powered electronically and has an eco-friendly motor. It can be used only when needed so the floor space is free until you call it. It is large enough to accommodate a wheelchair user and not too intrusive in your home. It can only be used by one single person at any one time.

Ceiling Track Hoists

Bickford

Making Things Easier For You

Ceiling Track Hoists

Our ceiling track hoists are a great solution for customers who do not have much space and with different models to choose from they eliminate the need for manual lifting.

Selecting a ceiling track lifting system offers a solution that is always in place, requires a minimum floor space and very easy to use.

It eliminates the need for manual lifting while providing a large lifting area and allows both low and very high lifting options.

There are different models and varieties for the required features, functionality and lifting capacity.

Toilet Solutions

Level Access Bathrooms

Bickford

Making Things Easier For You

Level Access Bathrooms

Our Level Access showers are the most popular choice for our customers as they are the most cost-effective solution to a Wet room featuring a toughened tray that can withstand a wheelchair user and carer, safety flooring to help prevent slips, level access which helps to prevent and reduce falls.

The level access shower can be made large enough to accommodate a required turning circle for wheelchair users and our showers are temperature controlled preventing users from being burned or scolded.

We look to install a gravity waste drainage system which is the most cost-effective drainage solution and prevents maintenance issues in the future. Heating is key to a lot of our service users who are elderly or feel the cold more due to their illness/disability, we can look to install underfloor heating where possible and we also use ladder style towel rails which give out more heat.

Accessible Bathrooms

Accessible Bathrooms

Wet Rooms

The wet room is the ultimate showering experience. The benefits in a wet room lie in the fact that we are able to start the installation from scratch, allowing us to tailor the showering area to suit our customers individual needs.

Our many years of working alongside occupational therapists means that we try to achieve the largest showering area possible, giving the best long-term solution to our customers. We offer a large choice of designs and pride ourselves in combining style and practicality in all of our wet room options.

Walk in Baths

We supply and install a full range of walk in baths. All baths are fitted with blender mixing valves or thermostatically controlled taps. As part of our walk-in bath range we install high level care baths that include all electrical works.

Our walk-in baths provide our customers with the accessibility they need to bathe safely and independently.

Key Features

- ✓ Wand-made fibre glass
- ✓ Inward opening door for customers with restricted hip, knee or leg movement
- ✓ Anti-slip seat and floor to help prevent slips and falls
- ✓ Easy to use handle, ideal for customers with restricted hand movement
- ✓ Unique to our walk-in baths-adjustable steel frame
- ✓ Fitted door with no leaks

Grab Rails

Bickford

Making Things Easier For You

Grab Rails

Bickford's grab rail range offers a wide variety of styles to ensure the appropriate level of support.

There are many benefits associated with installing grab rails in your home, they can be put almost anywhere. They provide support while you carry out tasks, helping you to balance and stay upright without any issues. They are a great addition to your home. If you need a little extra support while moving around.

One of the main benefits of having grab rails in your home is safety, they provide added protection when moving around your home. They reduce the risk of injury by acting as a support mechanism for anyone who wants to use the bathroom, shower, or stairs, and they can be installed almost anywhere.
